

Certificate of the Analysis of the Original Himalayan Crystal Salt Institute of Biophysical
Research, Las Vegas, Nevada, USA June 2001

Originally, the intention was to include all the elements up to Order Number 90 into the chemical and physical analysis. Following the elaborate analysis of the crystal salt from October 12, 2000, the Order Number of the elements was increased to 94 in the frequency spectrum test. All natural stable and unstable isotopes were considered. However, artificial and unstable isotopes were not included for consideration.
